Re: Five – Year Review of Reclamation Surety Estimate, Geokinetics Inc.,
Seep Ridge Project, M/047/002 Uintah County, Utah.

Dear Mr. Hedberg:

We have received your correspondence of September 11, 2002 regarding escalation of the surety estimate amount for our Seep Ridge Project in Uintah County, Utah. During September and October we have been in contact with Mr. Doug Jensen and Mr. Paul Baker regarding reclamation work which was completed on the project during the last week of October, 2002. A site inspection by Paul Baker has been scheduled for November 14, 2002.

Following the site inspection by Paul Baker and his approval of the reclamation work performed to date, it is our intention to apply for a partial bond release. We, therefore respectfully request an extension of time beyond the November 12, 2002 deadline for updating the surety.

Please let me know if you should require any additional information regarding our request.

Sincerely,

Michael A. Schott
Vice President
